

## Learning in New Zealand

New Zealand schools are focused on the learning of individuals and the classrooms are interactive and often fun.

New Zealand teachers are dedicated to bringing out the best in your child.

Your child will return home with improved English speaking skills and improved problem solving strategies.

New Zealand gives your child a high quality educational experience and the opportunity to grow.

You will both return home with new skills, knowledge and new friends.

“My standards are very high. New Zealand school standards are even higher.”

Excellent teachers and high quality education makes New Zealand schools amongst the best in the world.

## New Zealand Parent and Child Short Stay Programme

We invite you and your child to experience New Zealand.

## Parent and Child Short Stay Programme

You and your child come and live with a New Zealand family and join a school community.

We are offering short stay programmes in February and August.

### How long can we come for?

August: 1-6 weeks during New Zealand's winter season.

### Or

February: 1-4 weeks during New Zealand's summer season.

### Where will we live?

You will be homestayd together with a New Zealand family. You will experience the real 'Kiwi' way of life by living with and getting to know New Zealanders and make true friendships and long lasting relationships. New Zealand

homestays give you and your child the care and support you need.

### What will we do?

Your child will do a fully integrated school programme, with New Zealand students of the same age. There will be 25 hours of school per week, including 1 hour of ESOL each day. School classes run from approximately 9am until 3pm each day.

A personalised programme will be developed for you,

the parent. Options may include English classes, interest classes like cooking and a range of activities such as learn to play golf, garden tours, shopping trips and spa days. Day trips and half day trips to the city and local tourist attractions will also be offered and you will have choices.

### What age?

Students can be aged from 5 years to 15 years depending upon the type of school you choose and the location.

### What schools can we choose from?

Please refer to the school specific information on the separate inserts, or ask your agent for the details of each school. Each programme will be individually priced depending upon your choice of school, length of programme, activities and tours chosen.

### Can my friends come?

Most of the schools would like to host between 1-5 parents at once. A small group of friends with their children would be ideal.

## Summer in New Zealand

February is our high summer season. New Zealanders love the outdoors in summer and we will be at the beach, river or park. The beach is one of our favourite places for family fun.

Our days are long and the sun is strong. We eat outside using barbeques and have picnics during the weekends.

Many summer activities can be enjoyed such as sailing, golf, fishing, learn to surf, hiking and biking.

## Winter in New Zealand

August is midwinter in New Zealand. New Zealanders love the outdoors in winter and we visit the mountains, thermal areas and forests for a range of activities. We still use the beaches for winter walks and games.

Our days are short and the evenings long but we love to entertain from our spacious homes or go out for dinner and the movies.

We participate in winter activities such as skiing, hiking, golf, biking, sport and shopping.
